

**Highly available Organic silicon - Orthosilicic acid with glucosamin and chondroitin sulfate**

**Reference:003**

**Criteria associated:**

:

### **General informations**

Silicium Biogenique is formulated from orthosilicic acid, the highest available natural silicon for our organism. The silicon is present in our connective tissues, particularly in joints.

Chondroitin and glucosamin sulfates have been studied in many scientific researches. These two marine ingredients are present in our joints and contribute to their flexibility.

### **Composition**

Ingredients : Ro water, vegetable glycerol, chlorure choline-stabilised orthosilicic acid, glucosamin sulfate, chondroitin sulfate, natural flavour, steviol glycosides.

Nutrient Reference Values (NRVs) for 15 ml to dilute in water or fruit juice, twice a day:

Choline\* 1000 mg

glucosamin sulfate 300 mg

chondroitin sulfate 100 mg

Natural flavour 60 mg

Silicon\* 30 mg

Steviol glycosides 30 mg

\*choline-stabilised orthosilicic acid
