

## **Organic siliconcholine-stabilised orthosilicic acid - highest silicon bioavailability**

Drinkable organic silicon solution, a food supplement highly available, without any kidney problems

**Manufacturer:** Distri'biocom

**Reference:**002

### **Criteria associated:**

:

### **General informations**

This drinkable food supplement is a soluble organic silicon solution, choline-stabilised orthosilicic acid. According to European Food Safety Agency (EFSA), this active ingredient is considered as the highest available silicon source. This monomeric silicon formula is found naturally in our food (fresh vegetables, mineral water, plant sap...) and is also present in our whole organism (blood, executive bodies, connective tissues...). In connective tissues, silicon contributes to the good structure of tissues (like a grid). This grid contributes to a normal synthesis of collagen in skin or glycosaminoglycans in joints.

The choline contributes to a better silicon stability and bioavailability. It also improves liver functions.

### **Composition**

Ingredients : Ro water, vegetable glycerol, chlorure choline-stabilised orthosilicic acid, natural flavour, steviol glycosides.

Nutrient Reference Values (NRVs) for 15 ml to dilute in water or fruit juice, twice a day:

Choline\* 1000 mg

Natural flavour 60 mg

Silicon\* 30 mg

Steviol glycosides 30 mg

\*choline-stabilised orthosilicic acid
